SUMMARY

Frontend Developer with two years of experience building enterprise applications in a product-based startup. Proficient in modern frontend frameworks, including Angular and ReactJS . Experienced in implementing Keycloak authentication and working with FTL (Freemarker Template Language). Skilled in collaborating with cross-functional teams to develop scalable, user-centric solutions. Passionate about UI/UX best practices, responsive design, and emerging web technologies to enhance user experience.

WORK EXPERIENCE

BootNext Tech Ventures Pvt. Ltd. , Indore ,MP.   **July 2023 - Present**

- Contribution to the development of Nawat, a marketplace platform built on top of multiple cloud platforms (GCP and OCI), offering customers a comparison of resource(VM,Kubernetes) prices for easy purchasing decisions.
- Designed and implemented user interfaces to ensure seamless interaction with GCP and Oracle resources, enhancing the customer experience.
- Collaborated with the team to integrate Infrastructure as a Service (IaaS), Object storages and Databases solutions (MySQL, etc.).
- Worked on integrating AI services such as AI Studio and AI Development Toolkit into the platform.
- Preparing the platform for future enhancements, including expanded IaaS offerings for networking and security.
- Worked with FreeMarker Template Language(FTL) to generate keycloak login page for enterprise applications.
- Collaborated with the team to develop and maintain internal applications, focusing on enhancing user experience.
- Creating JSON structures for internal projects, enabling the dynamic generation of full pages and forms, streamlining development, and reducing code redundancy.
- Collaborated with senior developers and cross-functional teams (DevOps, QA, etc.) to debug, optimize, and deploy production-ready features.
- Utilized technical skills in Angular, Keycloak, Nx Workspace, Figma, and Docker.
